Co*STAR Mobile

Clearview's Co*STAR Mobile

PDA/SmartPhone Plug and Play for the IT Professional, Healthcare, Sales Force, Field Service

The agile worker requires mobile/wireless connectivity to the office for email, calendars and collaboration. It is estimated that 22% of the current workforce utilizes mobile devices for connectivity and that number is predicted to increase to 66% of the workforce in the next 5 years!

PDA's, Smart Phones, Wireless Laptops allow connection with email and calendars, but frequently fail to connect with the critical back office/legacy applications and data. What if the mobile workforce could access their back office application with a simple, affordable PDA/SmartPhone plug and play terminal emulator?

Co*STAR Mobile is built on Clearview's stable and reliable Co*STAR platform that has a 12 year history, supporting dozens of emulations, with over 200,000 installations. Fast and feature rich, Co*STAR Mobile currently provides terminal emulation for TN5250 with more on the way.

Co*STAR mobile offers a simplified plug and play SmartPhone Terminal Emulator, just load, configure your VPN or Internet connection and you have immediate access to your AS/400 applications.

What makes Co*STAR Mobile different?

- No confusing configuration parameters and variables
- No confusing licensing structures
- Point & Click Interface for Terminal Emulation
- Affordable Price

Who uses Co*STAR Mobile?

- IT Developers
- IT System Administrators
- IT Operations Managers
